Revolution 360 Light System

New

Max Depth	150 m
Price / Day	€90.00
EasyCare Bailment	EasyCare 500 — €500.00

Rental Days	Discount	Price / Day
3 - 6	0%	€90.00
7 - 13	10%	€81.00
14 - 20	17%	€74.70
21 - ∞	25%	€67.50

One year after the launch of Sphera, the housing for Insta360 Pro2 for 360-degree shooting that you control from your smartphone, in 2023 we will present at the Eudi Show in Bologna, Italy, a bright and innovative new product.

Revolution 360: compact, lightweight and easy to use, it is the led light that makes your life easier and changes the way you take photos and videos under the surface.

This is the result of our experience: for more than 20 years we have been developing new solutions to illuminate the deep sea and capture special moments. We listen to the needs of our customers, members of our tribe, and together with experienced divers we test new technologies to improve everyone's experience underwater.

We have incorporated 4 LEDs with total 28000 lumens into one powerful and super-compact lamp. No more ruined photos and videos because you didn't get the right exposure, forget the cluster illuminators that come in. Just light, the light you need and where you need it, to get the right illumination, with minimal weight and bulk.
The fully watertight body
is constructed from a block of aluminum milled specifically to house the 25.6V 3.3 Ah Li.fe battery pack.

The head houses 4 LEDs (1 front light and 3 side lights) with 7000 lumens for each led. These are Bridgelux LEDs (CRI of 93), the highest quality LEDs on the market today.

The power knob, on the back, has 4 positions,3 to adjust the light intensity:

- off

- on 1
- on 2
- on 3

Adjusting the power allows you to have the ideal light contrast. We set it to 30%, 70% and 120% but you can set the intensity you want, independently, from the Revmote APP (free download from Google Play or Apple Store).

The Ball (25mm - international standard) next to the power knob allows you to attach a floating arm to make the system neutral in water.

You will also find a battery charger in the package. The battery lasts from a minimum of 30 minutes when used at full power to a maximum of about 3 hours used at minimum power (5%).

The charging system
puts you out of risks; thanks to an external attachment, you don't have to open or disassemble the product to access the battery.

Revolution 360 is guaranteed for 5 years from water infiltration and flooding.

Full light for optimal color rendering

In the depths you always need light, if you want to achieve high-fidelity colors and realistic tones. That's why we spend a lot of time researching and developing new solutions.

We design reliable lighting systems that allow you to explore the darkness and capture perfect moments.

Our systems are lightweight, compact, easy to use and reliable. They can be used with Sphera 360 and in together with a buoyancy arm like the 7032 model.

Payment & Rental Terms

Prices are quoted per rental day, tax excluded; VAT is added at checkout in accordance with applicable tax regulations. Minimum rental period is 3 days. Duration-based discounts apply automatically as shown in the Rental Pricing table above.

EasyCare Bailment is a mandatory refundable security deposit, charged in addition to the rental fee at checkout. It is fully refunded once the equipment is received back and inspected at our workshop, less any costs for damage or missing items beyond reasonable wear and tear.

Secure Wire Transfers payment.
Equipment is shipped by courier service.
Equipment is returned ex-works for inspection prior to reimbursement of the EasyCare amount.
